

# ELEKTRON FEEDS

## ELEKTRON FEEDS DISTRIBUTION POLICY SUMMARY MESSAGE

### ELEKTRON REAL TIME SERVICE

**ELEKTRON REAL TIME** is Thomson Reuters next generation market data collection and distribution technology underpinning real time services exposed through strategic products such as Eikon, Elektron Deployed, Elektron Edge, Elektron Connect and Elektron as a Service. It delivers full tick, conflated or optimised data, depth of market content, with coverage that spans more than 500 global exchange-traded and OTC markets, and leverages the latest technology to ensure timely delivery and ease of integration. Elektron has been architected to provide resiliency across both the collection and distribution data centres with independent mirrored sites in place in each city.

**Asia Collections and Distribution:** All content collected and distributed within the Asia region via the Elektron Real time network can be delivered as a full tick “quality of service” ( via our EaaS offering or Elektron Edge). Content collected outside of the Asia region is delivered as an Optimized “quality of service” (Optimized is defined as trade safe – all trade details are delivered and 3 updates per second for Quotes). Other options for Real time content delivery are our Elektron Connect delivery that offers an Optimized quality of service for all content.
